1.0 Overview

1.1 This document outlines the additional features, Improvements, and bug fixes to the 4th generation website, version 4.1.2.

1.2 This version as with all previous versions provides remote access to the automatic recorded data and alarm exceptions of the sensing probes installed in the customer's facility. Customers can gain access to their data via the secure Tutela V4 web base application hosted by Tutela medical. The data records are published in real time via these secure web pages. Remote site hosting, maintenance and validation of electronic data records are regulated through Tutela Medical UK ISO 9001 Business Management System.
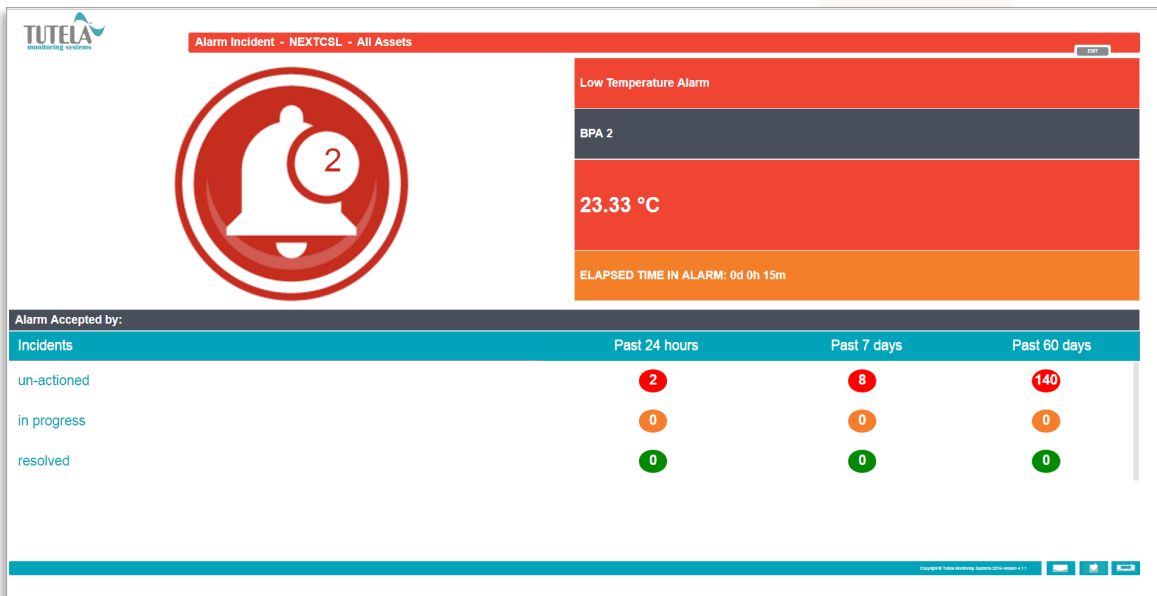

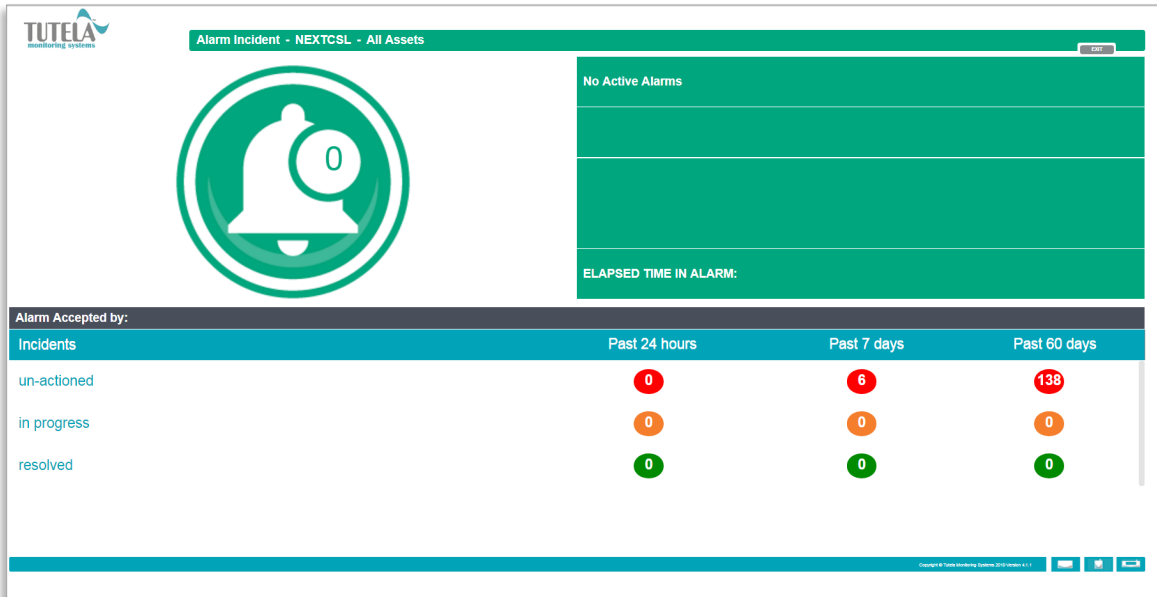

2.0 Additional Features

2.1 A comment dialogue box has been added to allow the users to add reasons for changing the alarm and alert settings. The new dialogue box appears, before pin code dialogue. (CR 075).

2.2 Search Functionality to allow Support to easily locate the customer from the customer list. The search is now a wildcard search instead of based on the first letters of the customer's name. (CR 53).

2.3 Alarm Dashboards, A simple status dashboard that gives real time status of the alarms affecting user's cold chain at a glance. Plus giving insight into the status of outstanding incidents over the last 60 days.

3.0 Improvements/Enhancements

3.1   Error Page – An error page now directs the user back to the login page.

3.2   Graphing - The Graph Y axis has been fixed to display more user-friendly intervals. (CR 089).

3.3   Settings - If a user's attempted to adjust settings fails, a message now appears to inform them of the failure.

3.4   Sites & Departments - Improvement to the speed of the sensor list page loading.

3.4   User Activity - departmental activity audits are now shown in the default selection.

3.5   User Management - All users can now amend their own user name and password.

3.6   User Management – pin code failure count can be reset by disabling and enabling the user.

4.0 Removed/Retired Features

4.1   None.

5.0 Bug Fixes

5.1   Audit Reports - Inconsistencies in time zones on reports has been corrected.

5.2   Audit Reports - Not all standard comments from sites were available for selection whilst signing off incident audits.

5.3   Graphing – Inconsistencies in the axis margin when a pervious or next day was selected.

5.4   Graphing - Time zone offset bug displaying data from a previous day is fixed.

5.5   Library – Customer admins could add files to the global directories.

5.6   Library – User admins could remove files from the global directories.

5.7   Reports – Had the incorrect address in the footer.

5.8   Secondary Signoff – Reports requiring a secondary signoff were not saving automatically to the library.

5.9   Sensor List - Battery icon didn't display the same colour icon as Tutela V3, if no data was available to read.

5.10   Sensor List – the Max, Min an average was inconsistent for customers with background minute logging.

5.11   Setting – The settings export didn't include the high and low alarm delays.

5.12   User Audits – Audits for settings amendments now only appear in the relevant department.

5.13   User Management – When a user changes the username all permissions are now retained.

5.14   User Management - A standard user can now amend their own password and pin code through edit profile function.
