Event Driven Actions and Incident Sign Off

If you are using our Event Driven Actions (EDA) service to have Alerts and Alarms accompanied by checklists/digital assistance that guide staff to resolve the alert/alarm issue, you can sign-off an incident by completing a check within a checklist that has the Alert Action 'Clear'.

With CAM+ 4.3.2.1 you can also sign-off an incident in the CAM+ website using the Supervisory Sign-Off fields on the Incident Audit page (and the multi-incident and multi-supervisory sign off pages).

If you allow sign-off by including a Clear Alert action in a checklist and it is completed by a checklist user, then the Supervisory Sign-Off field is completed for you by Checkit. But in some situations it may be preferable to omit the Clear Alert action from the checklist so that the alert may only be cleared/signed-off by senior/central staff with access to the CAM+ website.

By default, when Event Driven Actions is added to an account, the ability to sign-off incidents in the CAM+ website is removed, so if you would like to use this new option please contact us to enable it: help@checkit.net.

The Incident audit page will show the "Edit" button  enabled.

System Requirements

There is no change to the System Requirements for CAM+ when compared with the immediately previous release – the requirements are repeated here for convenience only.
