Contents

1.0 Overview

1.1 This document outlines the additional features, Improvements, and bug fixes to the 4th generation website.

1.2 This version as with all previous versions provides remote access to the automatic recorded data and alarm exceptions of the sensing probes installed in the customer's facility. Customers can gain access to their data via the secure Connected Automated Monitoring web base application. The data records are published in real-time via these secure web pages. Remote site hosting, maintenance, and validation of electronic data records are regulated through Tutela Medical UK ISO 9001 Business Management System.

2.0 Additional Features

3.0 Improvements/Enhancements

4.0 Removed/Retired Features

1. KPI Reporting permissions are removed from user permissions dialog as these permissions are not being in use.

5.0 Bug Fixes

1. Few fixes have been done to make the CAM+ webapp more secure:

- Pin code reset mechanism has been changed under the button "Forgot Pincode". It will ask the username and email, and will send a pincode reset link which will be valid only for 24 hours. Users can reset the pincode using that link, and the link will not be active anymore.
- In the "Forgot password" button, the response will be same when user provides wrong username or when user provides right username. The response code is changed whereas the page redirected to is same.
- Better file type checking has been added in libraries which will only allow real PDF files only.

2. New password should be different from old password in "Forgot Password" page. An error message will be displayed otherwise.

3. A fix has been applied on sensor graphs page as the alarm dots in the graph was disappearing on refresh.

4. Navigations are fixed as browser back button was navigating to the wrong pages.

5. A fix has been applied so that wrong sensor should not be selected intermittently from sensor list page.

6.0 System Requirements

	Windows 10	Windows 8.1	Windows 8	Windows 7 64-Bit	Windows 7	Windows XP
